

ENVIRONMENTAL POLICY

The company is committed to meeting industry best practice in environmental performance

We recognise that our activities will always have some impact on the environment and will endeavour to minimise them where possible. We believe that good environmental performance helps ensure good business performance.

In pursuit of these goals we will seek continuous improvement by implementing the following principles:

- Conduct our activities within the law and the requirements of statutory regulators.
- Develop and promote policies and procedures that minimise the environmental impacts that our activities have upon the environment, prevent pollution and deal with emergencies efficiently and effectively.
- Work with stakeholders, clients, suppliers and communities in which we operate to pursue environmental best practice and encourage the development of suitable methods which promote environmental protection and/or minimise their environmental effects and to apply environmentally favourable solutions.
- Educate and train our employees to help them include environmental considerations in all aspects of their work.
- Make efficient use of energy and natural resources and, where possible, minimise the use of raw materials and the production of waste.

It is envisaged that environmental issues, environmental legislation and environmental priorities will change with time. Therefore, the company will monitor environmental developments, regularly review and where necessary amend, revise or make additions to this policy at a frequency of no less than annually.
